

Annex E

(informative)

Security of video contents

E.1 Copyright of contents

Video contents are commercially released intellectual property and its copyright shall be protected. The information of copyright is indicated by CGMS-A information.

E.2 Copyright protection for video signal output

CGMS-A information indicates the condition of the copyright and copying of the contents. A copyright protection method should be applied with CGMS-A information to the digital video output signal and analogue video output signal appropriately.

[illegible]

E.3 Copyright protection for other path

Though the digital video signal output has a appropriate copy protection method, the other path also should be protected.

[illegible]
