Guidelines for TC100/2455/NP USB related discussions under TA14

Background

- TC100/2455/NP specifies guidelines for supporting common charging interoperability of mobile computing devices based on USB specifications (USB Type-C™ and USB PD 2.0)
 - PT will define high-level requirements regarding usage of USB specs
 - proposals for enhancements to USB specifications will be considered under USB promoter groups to develop technical requirements for implementation
 - NP standard will normatively reference the appropriate USB specifications which are required for the normative content
- Cooperation with USB-IF /USB promoter groups to support NP development
 - Based on USB-IF's Category D liaison with TC100, USB-IF will appoint representatives to participate as experts in the PT

Guidelines for expert discussions under TA14 or PT

- all experts shall follow IEC IPR rules for technical contributions
- all experts are expected to follow additional rules regarding USB discussions
 - technical discussions will be limited to high-level requirements and publicly available USB specifications/information
 - technical proposals for enhancements to USB specs will not be discussed
 - technical proposals can only be contributed to the USB promoter groups by parties who have executed the USB 2.0/3.0 Promoter Group Contributor Agreements
 - experts who are interested to join the USB 3.0/USB.20 Promoter Group discussions can contact the USB-IF liaison representative: Jeff Ravencraft (jravencraft@mail.usb.org)
