

## **Scheme for new item proposal in TC100**

2017-08-29

J. Yoshio

1. **When the content of the new topic is included in the scope of the existing TA**
  - Consult a new topic to TA and consult the submission of NP.
2. **The content of the new topic is not included in the scope of the existing TA, or it is unclear whether it is included or not.**
  - Propose new topics to AGS for improving work efficiency.
  - AGS examines whether its topic is a TC 100 issue and investigates the contents of the problem so that it will fit within the scope of TC 100 currently or forecasted to be in the near future. Therefore, if necessary, establish SS and perform liaison with external organization.
  - If the topic already has content as a draft standard and it is clear that it is a TC 100 issue, In consideration of becoming a project immediately under TC 100, AGS recommends NP proposal or Fast track procedure

Note: The above 1 and 2 are the recommendation procedure as TC 100, and are not intended to deny the NP proposal (or Fast track procedure) without prior proposal/consultation to AGS or TA according to ISO/IEC Directives.
